ACKNOWLEDGMENT:

We as a team are very grateful and is a great pleasure to undertake this project as a J component for CSE3002 subject which is entitled – “VEPON-VIT’S PERSONALIZED PLACEMENT PORTAL”

We are very grateful to our faculty member [Dr. L.M. Jenila Livingston](#). This project would not have been possible without her enormous help and worthy guidance whenever it is needed. Her support and suggestions proved valuable in enabling the successful completion of the project.

Abstract

Campus Recruitment or Campus Placement is the most popular method for selecting candidates from an organization. The term Campus Recruitment refers to the system where various organizations visit to the college (campuses) to recruit bright talent. Students, who are keen on beginning their professional career as soon as they finish studies, find the opportunity knocking at their doors. They can thus get the training and acquire professional skills immediately after college. This is a very good opportunity to enter the job market as entry otherwise becomes difficult. Educational institutions have realized that there is lot gap between market demands and student academic knowledge. Possible interventions in early stage of student academics with changes in curriculum has started but still getting right skillset of people to help them design is a big challenge especially. Hence, the companies need to spend more time and effort to improve the skill sets in hiring the perfect talent for their organizations to be the best in the market. Campus Recruitment or Campus Placement is the most popular method for selecting candidates from an organization. In Campus Recruitment, Companies / Corporate visit Technical and Professional Institutes and hire young intelligent and smart students who are eligible for the said job profile. The eligibility criteria differs from company to company. The most significant fact about Campus Recruitment is that instead of the job seekers approaching employers, the employers come to the most suitable prospective candidate with a job offer and that being the campuses which has the immediate source. A Placement Officer is hired by the institute who coordinates with small, medium and large sized Companies and helps in streamlining the entire Campus Recruitment procedure. The term Campus Recruitment refers to the system where various organizations visit to the college (campuses) to recruit bright talent. Students, who are keen on beginning their professional career as soon as they finish studies, find the opportunity knocking at their

doors. They can thus get the training and acquire professional skills immediately after college. This is a very good opportunity to enter the job market as entry otherwise becomes difficult. Companies have been using a variety of methods to employ and select personnel to work for them and Campus Recruitment is one of the newest methods used by most Companies today.

Introduction

The campus recruitment which was slow previously is now in a full swing from the past 3-4 years. The quality of students who qualify out of engineering and other educational institutions are not reaching the required criteria of the company's requisites. The major educational institutions are now working to reduce the gap between what the market demands compared to the knowledge level of the students. There are some challenges faced by IT sector in Campus recruitment.

Most of the Campus Recruitment drives have a fixed pattern. Companies visit colleges with a small team that does all the hiring. Now since the staff is outnumbered by the high number of applicants, it poses a lot of problems in managing the whole drive. Candidate engagement is a big challenge and sometimes few candidates miss to be properly notified by the company about the further process.

All this makes the process extremely slow, inefficient, and complicated.

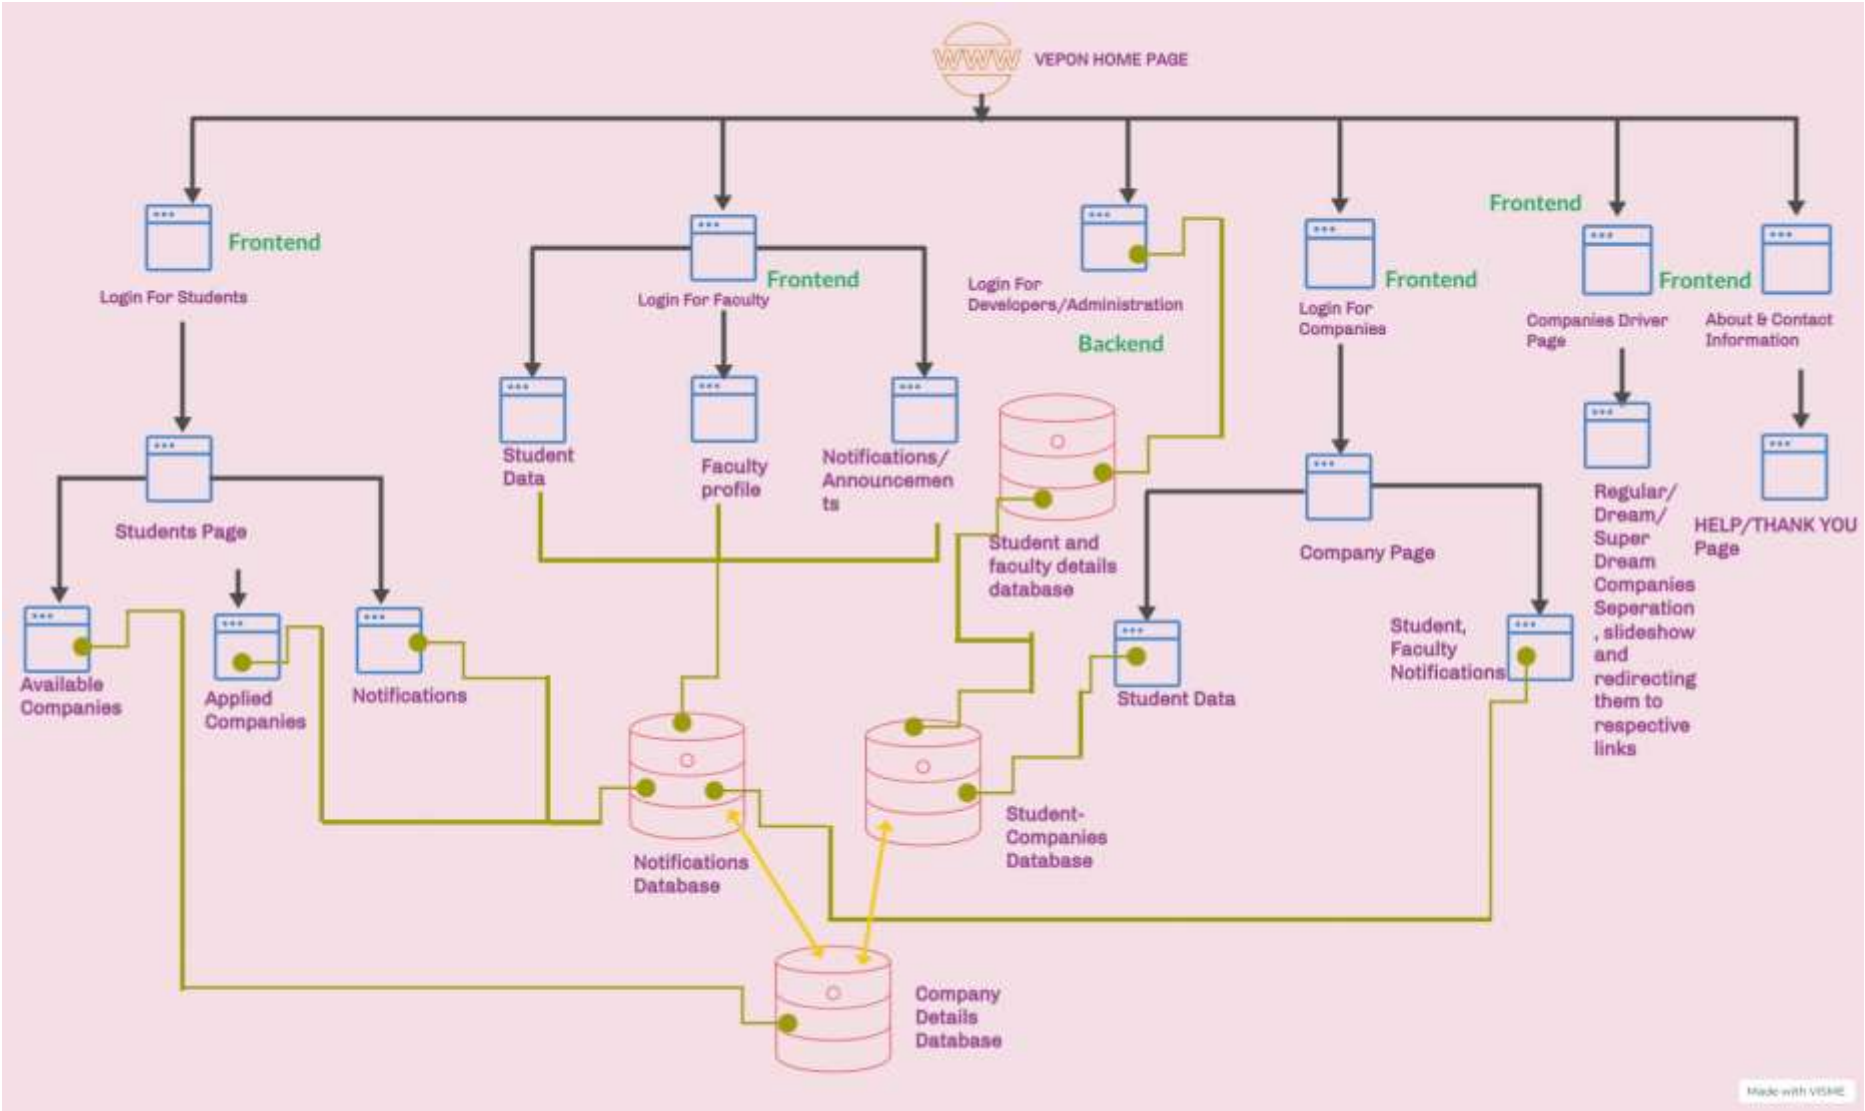

Project Motive

Our website which we created is to be maintained by the institutions and the website makes the placement process easy. An institution like, VIT which has nearly more than 10000 students applying for placements is hectic process and also an important process as it's the placements. So, we created the website which is VIT'S personalized placement portal which will be a medium of communication between the college management, faculty, the companies and the students. The website will be a medium between the companies, faculty (college management), companies and also companies can send the notifications or important messages/notifications regarding exams, interviews to the students and also to the faculty.

This will be reducing the tension and the workload for the college management, students and also the companies as there now avail to the medium of communication.

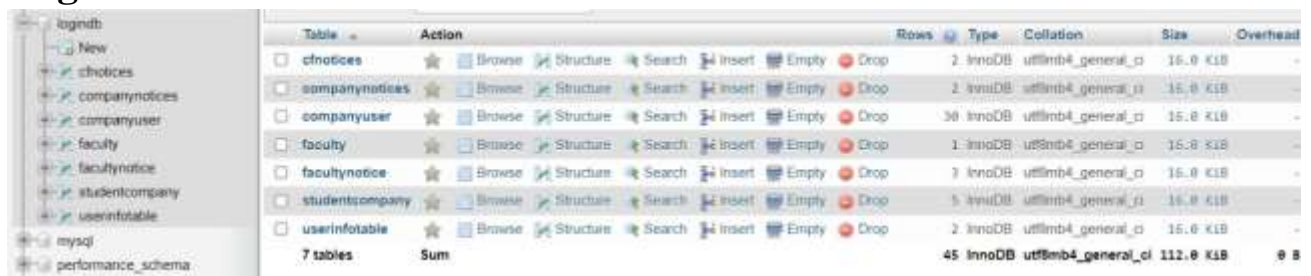

This is our project motive to create the placement portal for the VIT institution.

Architectural Diagram

Database Details:

LognoDB:

The screenshot shows the MySQL Enterprise console interface. On the left, a tree view displays the database structure under 'logndb', including 'New', 'choices', 'companynotices', 'companyuser', 'faculty', 'facultynotice', 'studentcompany', 'userinfotable', 'mysql', and 'performance_schema'. The main panel shows a table list for 'logndb' with columns: Table, Action, Rows, Type, Collation, Size, and Overhead. The table list includes: choices (2 rows, InnoDB, utf8mb4_general_ci, 16.0 KiB), companynotices (2 rows, InnoDB, utf8mb4_general_ci, 16.0 KiB), companyuser (30 rows, InnoDB, utf8mb4_general_ci, 16.0 KiB), faculty (1 row, InnoDB, utf8mb4_general_ci, 16.0 KiB), facultynotice (3 rows, InnoDB, utf8mb4_general_ci, 16.0 KiB), studentcompany (5 rows, InnoDB, utf8mb4_general_ci, 16.0 KiB), and userinfotable (2 rows, InnoDB, utf8mb4_general_ci, 16.0 KiB). A summary row at the bottom indicates 7 tables, a total of 45 rows, and a total size of 112.0 KiB.

Table	Action	Rows	Type	Collation	Size	Overhead
choices	Browse Structure Search Insert Empty Drop	2	InnoDB	utf8mb4_general_ci	16.0 KiB	-
companynotices	Browse Structure Search Insert Empty Drop	2	InnoDB	utf8mb4_general_ci	16.0 KiB	-
companyuser	Browse Structure Search Insert Empty Drop	30	InnoDB	utf8mb4_general_ci	16.0 KiB	-
faculty	Browse Structure Search Insert Empty Drop	1	InnoDB	utf8mb4_general_ci	16.0 KiB	-
facultynotice	Browse Structure Search Insert Empty Drop	3	InnoDB	utf8mb4_general_ci	16.0 KiB	-
studentcompany	Browse Structure Search Insert Empty Drop	5	InnoDB	utf8mb4_general_ci	16.0 KiB	-
userinfotable	Browse Structure Search Insert Empty Drop	2	InnoDB	utf8mb4_general_ci	16.0 KiB	-
7 tables	Sum	45	InnoDB	utf8mb4_general_ci	112.0 KiB	0 B

Schema Details:

1. userinfotable (stores the details of the students):

The screenshot shows the schema details for the 'userinfotable' table. The columns are: username, password, fullname, gender, email, phone, dob, lngen1, lngen2, lngen3, campus, branch, rgn1, rgn2, and rgn3. The table contains two rows of data.

username	password	fullname	gender	email	phone	dob	lngen1	lngen2	lngen3	campus	branch	rgn1	rgn2	rgn3
100CE1111	itsahs	itsahs	male	itsahs@gmail.com	678257388	2002-04-03	Python	Java	C++	shenai	Computer Science & Engineering	9	9	9
20BAI1061	itsahs	Merish Shree Kyan Reddy	male	shreeshreemaria1500@gmail.com	914783647	2002-11-02	Python	Java	C++	shenai	Computer Science & Engineering	9.1	9.2	9.3

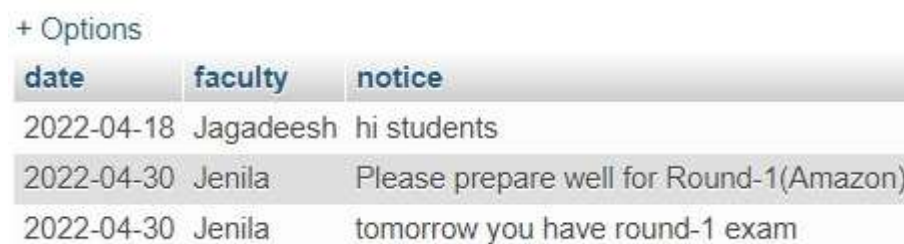

2. studentcompany (stores the details of the students & applied companies):

The screenshot shows the schema details for the 'studentcompany' table. The columns are: studentid and companyname. The table contains five rows of data.

studentid	companyname
20BAI1061	amazon
19BCE1111	amazon
20BAI1061	vedantu
20BAI1061	jio
20BAI1061	oracle

3. facultynotice (stores the notifications from faculty to the students):

The screenshot shows the schema details for the 'facultynotice' table. The columns are: date, faculty, and notice. The table contains three rows of data.

date	faculty	notice
2022-04-18	Jagadeesh	hi students
2022-04-30	Jenila	Please prepare well for Round-1(Amazon)
2022-04-30	Jenila	tomorrow you have round-1 exam

4. faculty (stores the details of the faculties):

The screenshot shows the schema details for the 'faculty' table. The columns are: username, password, fullname, email, and dob. The table contains one row of data.

username	password	fullname	email	dob
Jenila	Jenila123	Jenila Livingston	Jenila@gmail.com	1975-07-17

5. companyuser (stores the details of the companies):

Methodology

Detailed Description of the project:

This plan is only according to the VIT curriculum:

1. The students register in the website and the details will be verified.
2. They will be having the username and password to login into the websites.
3. There are 3 login pages which are for students, faculty/college management and also for the companies.
4. So, after the student's login into the webpage they will be directed to the page which the companies available for him to apply along with the last dates to apply, and also the required cgpa to apply for the company. He also has the page which will be having the student profile. He also has the option of notifications where he will be viewing the messages from the faculty or the company. He also option to view the companies to which he applied.
5. The student can view the companies which are classified according to the super dream, dream & regular companies.
- 6.

7. There will be also a company drivers page where there will be the slide show of the companies which are divided into super dream, dream & regular companies and they can visit the links by pressing on the images if they have any doubts.
8. We also made the change password available to the students, faculty and also the companies.
9. There is also the forgot password option in the login page for the students.
10. There is also the faculty login where the faculty will be logging in and will be directed to the page where he can see the students under his/her.
11. They can view the notifications from the campus and they can send the notifications to the students by selecting the date.
12. The next login page is for the companies where he will be logging in to the page.
13. They can see the students registered under the company.
14. They can send the notifications to the students and the faculty regarding the tests and announcements and also about the students who got selected etc.
15. In this we provided the three interfaces for the students, faculty and the companies.
16. We also have the help which contains all the details of the companies and respective links.
17. In this way we implemented the methodology of the project and achieved our goal of becoming a placement portal by becoming the medium between the students, college management/faculty and the companies.

Modules:

HOME PAGE (FRONT END):

1. STUDENT LOGIN:

- a. REGISTER
- b. FORGOT PASSWORD
- c. LOGIN:
 - i. AVAILABLE COMPANIES
 - ii. APPLIED COMPANIES
 - iii. STUDENT PROFILE
 - iv. NOTIFICATIONS:
 - a. FACULTY NOTIFICATIONS

 - v. COMPANY DRIVERS PAGE
 - vi. CHANGE PASSWORD
 - vii. SIGN OUT
 - viii. HOME PAGE

2. FACULTY LOGIN:

- i. FORGOT PASSWORD
- ii. LOGIN:
 - a. STUDENTS DETAILS
 - b. ANNOUNCEMENTS TO STUDENTS
 - c. NOTIFICATIONS FROM COMPANIES
 - d. COMPANY DRIVERS PAGE
 - e. FACULTY PROFILE
 - f. CHANGE PASSWORD
 - g. SIGNOUT
 - h. HOME PAGE

3. COMPANY/PLACEMENT LOGIN:

- i. FORGOT PASSWORD
- ii. LOGIN:
 - a) STUDENTS DATA
 - b) STUDENTS NOTIFICATION(SEND)
 - c) CAMPUS NOTIFICATIONS(SEND)
 - d) COMPANY DRIVERS PAGE
 - e) CHANGE PASSWORD
 - f) SIGN OUT
 - g) HOME PAGE

4. COMPANY DRIVERS PAGE:

- i. REGULAR COMPANIES
- ii. DREAM COMPANIES
- iii. SUPER DREAM COMPANIES
- iv. STUDENT LOGIN
- v. FACULTY LOGIN
- vi. HOME PAGE

5. HELP PAGE:

- i. INFORMATION PAGE

System Notifications

Hardware Requirement for the project:

Most current computers and laptops have high enough specifications to be used to create a website. The most important specification to check on the computer would be the size of the RAM, which should be over 2GB, though more is better

Software Requirement for the project:

We need the compilers which can execute the PHP codes and also the JAVASCRIPT, HTML and the CSS.

We also need to install the XAMPP which is useful for running the APACHE and the MYSQL database for storing the details.

8.STUDENT LOGIN FORGOT PASSWORD:

The screenshot shows a web browser window with the URL `localhost:8084/WP%20PROJECT/project2/forgotpassword.php`. The page contains a 'Login Form' with the following fields and buttons:

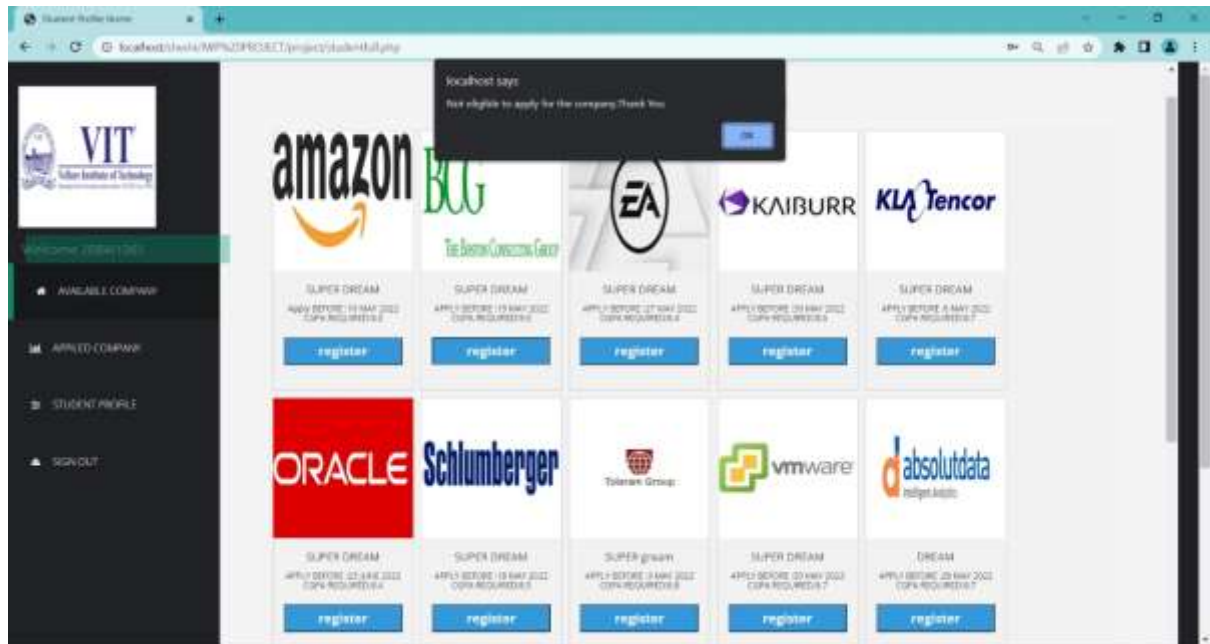

- Username:** A text input field with a user icon.
- Email:** A text input field with an email icon.
- Full name:** A text input field with a person icon.
- Login:** A green button.
- Back:** A red button.

9.STUDENTS, AVAILABLE COMPANIES PAGE:

The screenshot shows a web browser window with the URL `localhost:8084/WP%20PROJECT/project2/student.php`. The page displays a grid of available companies for students to apply to. The grid is organized into two rows of five companies each. Each company entry includes the company logo, the text 'SUPER DREAM' (except for absolutdata which says 'DREAM'), the application deadline, and a 'register' button.

Company	Application Deadline	Action
amazon	APPLY BEFORE: 22 MAY 2022 CUPA REQUIRED: 0.5	register
BCG The Boston Consulting Group	APPLY BEFORE: 24 MAY 2022 CUPA REQUIRED: 0.5	register
EA	APPLY BEFORE: 27 MAY 2022 CUPA REQUIRED: 0.4	register
KAIBURR	APPLY BEFORE: 30 MAY 2022 CUPA REQUIRED: 0.5	register
KLA Tencor	APPLY BEFORE: 31 MAY 2022 CUPA REQUIRED: 0.7	register
ORACLE	APPLY BEFORE: 01 JUN 2022 CUPA REQUIRED: 0.4	register
Schlumberger	APPLY BEFORE: 10 MAY 2022 CUPA REQUIRED: 0.4	register
Telcel Group	APPLY BEFORE: 14 MAY 2022 CUPA REQUIRED: 0.5	register
vmware	APPLY BEFORE: 15 MAY 2022 CUPA REQUIRED: 0.7	register
absolutdata Insight Analytics	APPLY BEFORE: 30 MAY 2022 CUPA REQUIRED: 0.7	register

Conclusion

The campus placement portal for the VIT is implemented to make the task of campus placement easier and also during pandemic times it will be so much useful and also helpful as most tasks are becoming virtual now. This website can be optimized for other institutions like having separate database for each college like "Codetantra", "Moodle" etc. We can add other features such as resume uploading, conducting tests and lists up-dation process etc. In this way we have implemented the website for placement portal which is acting as a medium between students, faculty and the companies and also can be developed more in future.
